Lesson 5: Problem-Solving Practice

**Problem-Solving Strategies**

A. Break down the problem into smaller parts.

B. Look for a pattern or a shortcut.

C. Use a diagram or a picture to help visualize the problem.

D. Make a table or a chart to organize the information.

E. Check your work by going back to the original problem and verifying your solution.

---

1. How many minutes (of any size) are there in 2 hours?

2. When the price of a video game system is lowered, the interest is reduced to 70%. If the original price was $375, what is the sale price?

3. A rectangle is divided into 70 squares. If the original price was $375, what is the sale price?
