If you got...

\[ m = \frac{1}{4} \]

Find the slope given two points on the graph.

---

If you got...

\[ m = 1 \]

Find the slope given two points on the graph.
If you got...

\[ m = \frac{3}{8} \]

Find the slope given two points on the graph.

If you got...

\[ m = -\frac{3}{5} \]

Find the slope given two points on the graph.
Find the slope given two points on the graph.

If you got...

$m = 3$

Find the slope given two points on the graph.

If you got...

$m = 0$
If you got...

$m = -1$

Find the slope given two points on the graph.

If you got...

$m = -\frac{1}{2}$

Find the slope given two points on the graph.
If you got...

\[ m = -3 \]

Find the slope given two points on the graph.

If you got...

undefined

Find the slope given two points on the graph.
If you got...

\[ m = -\frac{3}{2} \]

Find the slope given two points on the graph.

If you got...

\[ m = -4 \]

Find the slope given two points on the graph.
