23. What is the minimum price of a home for sale?
22. What percent of the homes are selling at $101,000 and below?
21. What is the median price of a home for sale?
20. What is the median price of a home for sale?

19. What is the upper quartile?
18. What is the lower quartile?
17. What is the median?
16. What is the number of houses at the 75th percentile?
15. What is the number of houses at the 50th percentile?
14. What is the number of houses at the 25th percentile?
13. What is the maximum number of houses downloaded?
12. What is the minimum number of houses downloaded?

11. What percent of the data lies between the lower quartile and the upper quartile?
10. What percent of the data lies below the upper quartile?
 9. What percent of the data lies below the median?
 8. What is the value of the median?
 7. What is the value of the minimum value?
 6. What is the value of the first quartile?
 5. What is the value of the third quartile?
 4. What is the value of the median?

2. Using the box and whisker plot shown, identify what % of the data lies in each region:

1. Load the parts to the box and whisker plot shown.

Statistics: Box Plots

For this data: From 15 to 65, the box and whisker plot depicts this data.

The number of houses downloaded by 25 students in one week ranges.
